NO. 25

IS A CREDIT TO BASSANO

Alberta Hotel to be Veneered with Brick and, to be Provided with a Firewall and Otherwise Improved at a Cost of \$5,000.

THE ALBERTA HOTEL is to be improved to the extent of \$5,000, and the work was inaugurated at the beginning of the week. The task is under the superintendence of W. E. White, the builder who had charge of the construction of the building. The exterior of the big hostelry is to be veneered with pressed brick made in Medicine Hat. In order to lessen the fire risk and to cut down the cost of insurance a fire wall twelve inches in width will be constructed on the west end of the building. The fire wall will extend above the roof and the openings in it for the windows will be protected with iron shutters. This wall will protect the hotel at its most vulnerable side from destruction by fire as there are no other buildings close to the Alberta on the northern, eastern and southern sides. The hotel will also be provided with a complete fire-fighting apparatus. A large gasoline engine is to be placed in the basement which will force the water to the upper portions of the building. Hose leading from stand pipes, ready for instantaneous action in case of a sudden outbreak of flames, will be located on each floor. The hotel apparatus will be drilled frequently so as to be able to use the fire fighting apparatus effectively.

Hot and cold water will be provided throughout and two large bathrooms, with up-to-date tubs and the best of accessories and fittings, and five flush closets are to be provided. The interior of the hotel is to be redecorated and painted. The Alberta hotel, owned by Messrs. Pierce & Ferguson, throw open its doors and invited the patronage of the public on March 27 of the present year. Since that date it has been under the management of G. M. Pierce, a most capable hotel man, and has justly earned the reputation of being one of the best operated hotels along the main line of the Canadian Pacific Railway between Calgary and Winnipeg. It is evident from the costly improvements that are being made in this Alberta that Messrs. Pierce & Ferguson believe that nothing that they can provide is too good for their many patrons, and the generous patronage they are receiving reveals that the public fully appreciate what they are receiving. An hotel like the Alberta is a valuable asset to any town.

MEETING OF THE COUNCIL

It is Decided to Lay Down Gravel Crosswalks—Road to be Gravelled.

A meeting of the council was held on Monday evening with W. E. White in the chair and Councilmen H. S. Johnson and Frank Berry in attendance.

Resolutions were passed providing for gravel crosswalks on the main streets and for gravel to be put down at the principal crossings.

It was stated during the session on the crosswalks that when made of gravel they cost less than when made of concrete and in addition the gravel lasts much longer than plank. It was further stated that the gravel will be secured from Mr.

McConaughy, who has a bed of gravel on his place a short distance south of town for thirty per cent of the cost of the gravel.

A resolution was adopted directing H. Leslie Brunton, secretary-treasurer, to send a communication to Superintendent Taylor of the Canadian Pacific requesting that the company put down a sidewalk along the extension of Third street from First avenue to the railway crossing.

Establish a pond, for sewage and other purposes, on the corner of Third and Second streets. The secretary was instructed to write to the provincial minister of public works for a copy of the point district ordinance.

Garbage is being dumped in several places and on motion Constable Jordan was directed to place a large sign on the village dumping ground, which is located in the eastern part of the townsite.

WEDDING BELLS

Miss Katherine Campbell and H. Leslie Brunton United in Marriage

The marriage of Miss Katherine Campbell and H. Leslie Brunton, popular young people of this town, took place in the presence of Mr. May's church, Calgary, at 10 o'clock on Saturday forenoon, Rev. Dunlop officiating.

The bride presented a handsome appearance in a white silk lace covered wedding dress. She carried a handsome shower bouquet of flowers. The wedding was private; only Mrs. C. Campbell, mother of the bride, and two friends being present.

In the afternoon at three o'clock the wedding feast took place at the Victoria hotel, which was attended by the following: Mr. and Mrs. L. Leslie Brunton, Mrs. C. Campbell, mother of the bride, W. S. Playfair, Joseph O'Keefe, H. Cunningham, Frank Stewart, Frank Berry, William MacLeod, and Miss James Smith, Miss Livingston, Mr. Johnson and others.

The wedding feast was a most enjoyable one and was much enjoyed by the high contracting parties as well as the guests. During its course the bride gave a most charming speech.

The wedding feast was principally of silverware and jewelry, very numerous and costly and revealed the high esteem with which the young people are held by a large circle of admiring friends.

Mr. and Mrs. Brunton left on Saturday evening's train for Banff, where they will reside for a short time.

Mr. Brunton is the accountant for Bond & Berry, general merchants of Bassano and is secretary-treasurer of the village in a position of great activity and is deservedly popular.

His bride is a handsome, charming and accomplished young lady, who recently came here from Medicine Hat, H. S. with her mother. During her short stay here she made many friends who are greatly pleased to see her happily wedded.

IS SECURING INDUSTRIES VERY RAPID

Medicine Hat Is Said to Be on the Eve of a Boom

A. V. Dinning, dry goods merchant of Medicine Hat, spent Sunday in Bassano and was surprised at the way the place is growing and said he was certain that it would be a town of much importance. Mr. Dinning is enthusiastic over Medicine Hat and says he is certain that it is entering a period of new and enlarged prosperity and this will be principally the result of the establishment of industries. One concern, which is manufacturing brick and tile there, will soon have a plant that will cost \$250,000 and will give employment to a large force of men. A rolling mill is projected which will put in a plant of at least \$100,000 and is guaranteed to give employment to fifty men the year round.

Medicine Hat has lots of natural gas and this is utilized in the making of brick and tile and it will be used by the rolling mill. The brick and tile plant has found a splendid quality of clay in its clay pits which makes a superior brick and which is combined by the management to be one of the best made. The brick made from this clay was subjected to severe tests in place of the best fire brick found on this continent and the home market was first and strong, while the imported material was crumbled to pieces owing to the fierce heat it was subjected to.

DEATH OF J. E. GILLIS

Deceased Last Week in an Attack of Typhoid-Febrile

J. E. Gillis died on Thursday last on his homestead near Hinton, from the effects of typhoid fever. Mr. Gillis was a native of Ontario and aged about 30 years. In his early manhood he immigrated to this country to Willow Grove, North Dakota, where he married and engaged in farming and where he lived for many years. In June, 1909, he came to Bassano. Here he built a house and soon afterwards bought his family. He took up his new home in Hinton and early in the present year he moved out to the place and began the work of improving his homestead.

While at the place he was seized with typhoid fever, which subsequently developed pneumonia, which caused his death.

During his stay in Bassano he made many friends who admired him for his integrity and industry of much public spirit and while he was a resident here he did all that he could as citizen to build the place up. He was a widow and four children, four boys and one girl, to mourn his demise. The youngest child is a boy of seven and the eldest is a young man of 19 years of age. The sincere sympathy of this community is extended to the bereaved family.

NEW MEAT FIRM.

T. J. Evans has purchased an interest in the Home Meat Market from G. G. Gilbert and the firm will be known as Gilbert & Evans. Mr. Evans has, he says, 400 head of beef cattle and these will be slaughtered as fast as they are needed. The firm intends to erect a slaughter house near the Bow river and also a good sized lot for the storage of meat during the hot weather. Messrs. Gilbert & Evans are experienced butchers and have many friends here who would be pleased to see them succeed.

AFTER GAS AT GLEICHEN

Drilling for gas started proper on Monday when the big hole was put down thirty-four feet this day when quicksand was encountered, and owing to the rain work was stopped until the carpenters could cover in the works and mud could be put down. Drilling was again started on Tuesday and good progress is being made. This marks the beginning of a new era for Gleichen, Cal.

VERY RAPID CHURCH BUILDING

Anglican Church to be Built by Volunteers in a Single Day—Ladies of the Church are to Furnish Dinner to Workers and Others.

IT IS PROPOSED to lay the foundation of a church in the morning to raise the superstructure walls, put on the roof and to hold divine services in the sacred structure the same evening. This is, indeed, a remarkable undertaking, but such is the plan to be followed in the construction of the Bassano Anglican church.

Rev. W. Leveridge, vicar of the Anglican church, in an interview with a News representative, stated that it was the intention to build the channel of the proposed English church, to be erected on lots owned by the church on the corner of Third avenue and Third street, within the confines of the hours of a single day. It will be like an old-fashioned barn raising or building bee with the difference that instead of a house or barn one of God's temples is to be reared.

The building material will be ready on the ground. Already a number of the residents have volunteered their services to erect the church in the stated time. A prominent contractor has been engaged to oversee the work and will be responsible to the church officials for the satisfactory construction of the edifice.

After a short prayer service work will be commenced at 7 a.m. on Wednesday, September 21st, and will be continued until noon without an intermission.

The workers will then partake of an excellent dinner provided by the ladies of the church. Those who desire to help swell the building fund and who are engaged in other projects, will prevent them from volunteering to work on the church, can participate in the noon feast for a consideration of 50 cents. After dinner work will be resumed and continued till the church is closed in. The church will be 22 by 16 feet. The nave will be added later on.

The day's work will end with appropriate services in the newly constructed church.

Bishop Pinkham, of Calgary, will honor the occasion with his presence and will deliver an address at the morning services. On Tuesday evening he will meet the members of the church.

Rev. Mr. Leveridge has gone into this building plan with energy and vigor, and the outlook is that on the evening of the 21st of September he will feel justly proud of the result of his own, of his vestrymen's and helpers' efforts.

This church will be the second to be constructed here. The Presbyterians have already erected a comfortable church on the corner of Fourth avenue and Third street. Although it was not built in a day yet it is a monument to the energy of Rev. John MacKillop and his countrymen. They have the honorable distinction of building the first church in Bassano.

A LARGE WOLF SHOT FRANK OLIVER'S SAYINGS

Measures Four Feet Ten Inches From Nose to Tip of Tail

E. A. White, who is located on a homestead south of the Bow river and two miles and a half east of the ferry, met with a strange experience last Friday. While working a short distance from his house he spotted a large wolf loitering in the neighborhood. As he had several chickens lately he went to the house for his shot gun and returned soon to find Mr. Wolf still on the warpath for more chicken. White shot the wolf with the first crack of his gun, but as his gun was loaded with buckshot he was surprised to find the wolf charged with BB shot and was not surprised to see the animal making for the distant lands at top speed. A couple of days later Mr. White was surprised to find his chicken yard lying dead a half mile from where he had shot the beast. The wolf measures four feet ten inches from nose to tip of tail.

OUR DRAMATIC CLUB

It Should Give Entertainments During the
Coming Winter.

What has become of the Bassano
Dramatic Society, which in April last
was rehearsing and wanted to give
the drama "The Farmer"? There was a
blitz in the plans owing to the trouble
experienced in finding a theatre suit-
able to fill two or three roles, and so
the plan of producing the play died
a horrible death. The Dramatic Society should
be revived and get actively at work
and give a series of performances dur-
ing the coming winter. There is an
abundance of dramatic and social
outings which could be utilized at
first in the production of a drama of
two, and afterwards one of Gilbert &
Sullivan's operas should be given. "The
Milkmaid" or "The Mikado" are within
the range of the ability of the local
actors. It is now too early to organize
the Dramatic Society for the winter
season.

TRADE AND COMMERCE GUIDE

Over 5,000 firms engaged in manu-
facturing in Canada, have inscribed their
names in the Bureau of Experts, which
has been established at the trade and
commerce department. The bureau
has been put in operation to circulate
information from foreign importers of
Canadian goods, and is expected to
lead to material trade development.

Synopsis of Canadian Northwest Land

Regulations

Any person who is the sole head of
a family, or any male over 18 years
old may homestead a quarter section
(160 acres, more or less) of available
homestead land in the Prov-
ince of Alberta. The applicant
must appear in person at the Provin-
cial Lands Agency, or Sub-Agency, for
the district. Entry by proxy may be
made at any agency, on certain con-
ditions, by father, mother, son,
daughter, brother or sister of in-
tending homesteader.

DUTIES—Six months' residence
upon and cultivation of the land in
each of three years. A homesteader
may live within nine miles of his
homestead on a farm of at least 80
acres solely owned and occupied by
him or his father, mother, son, daugh-
ter, brother or sister.

In certain districts a homesteader
in good standing may pre-empt a
quarter section adjoining his home-
stead. Price, \$3.00 per acre. DUTIES—
Must reside six months in each of
six years from date of homestead
entry (including the time required to
earn homestead patent) and cultivate
fifty acres extra.

A homesteader who has exhausted
his homestead right and cannot ob-
tain a pre-emption may take a pur-
chased homestead in certain districts.
Price, \$30.00 per acre. DUTIES—Must
reside six months in each of three
years, cultivate fifty acres and erect
a house worth \$200.

W. W. CORY.

Deputy of the Minister of the Interior

DONT RUIN YOURSELF!

By Paying the Price of

AN ACRE OF LAND FOR A TON OF HAY

For the Cost of 160 Tons of Hay I can sell you 160 Acres of the Finest Agricultural Land

With abundance of
Good Hay, Grass and Water

On the Main Line of the Canadian
Northern Railway, East of Edmon-
ton and West of Battleford

DRIVE YOUR STOCK NORTH TO WINTER INSTEAD OF LETTING THEM EAT THEIR HEADS OFF

If you feed them hay, it will cost you \$15 or \$20 a ton. In the
Spring you will have your cattle or horses but no hay.

That Spells big expense, doesn't it?

If you buy land at \$15 or \$20 per acre, in the Spring you will have
not only your stock, but also the land, and it will be worth
as much and—in the near future, anyway—more
than you paid for it.

And you get terms on it too, while you will
have to pay cash for your Hay

ISN'T THIS WORTH THINKING OVER?

You can find out all about the land and
how to reach it with your stock at

Supplement to the Bassano News

DUE TO ACCIDENT

Coroner Rose enquires into the Cause of R. D. Berry's Death

Dr. Rose of Gleichen arrived here on Friday evening and held a Coroner's inquiry into the cause of the death of Robert D. Berry who was accidentally killed on Friday forenoon. After hearing the testimony of the witnesses the coroner declared that the death was due to accident.

J. Devine, one of the men employed by Contractor McKenzie, testified: "On Friday morning at 11 o'clock was driving a dump wagon on the irrigation works near Bassano. The deceased was driving the dump wagon immediately ahead of mine and had just dumped his load when the horses began to run. I saw that the tongue of the wagon was broken, and called to Berry, who was on the seat of the wagon, to jump off the vehicle. Evidently, he did not hear me and instead of jumping he tried to pull up the horses and almost succeeded in doing so, when the horses resumed their struggles. Berry got out of the seat into the body of the wagon and the horses began to plunge violently and to run in a circle and finally they overturned the wagon and it fell over Berry. Then the horses dragged the wagon across his body. I immediately ran to where he was and took hold of him. He remarked that he was afraid that he was hurt too badly to live and I replied that I hoped not. I called for some water and when it came I bathed his head, and at his request, lifted his head upon my knee. At this juncture Mr. McKenzie, the contractor for whom we were working, arrived and I returned to my work.

Contractor McKenzie, the next witness, who was driving a grader a short distance from the scene of the accident and on being told about Mr. Berry being hurt hastened to the unfortunate man's side. He saw that Berry was seriously hurt and at once sent a messenger to tell Dr. Harris from Bassano and at the same time sent to the camp for a Democrat. When the vehicle arrived Berry was placed on a canvas stretcher and lifted into the Democrat and driven to the camp. Witness left him in charge of Timekeeper Winkler.

Mr. Winkler testified that as soon as he received instructions he procured the Democrat and drove as rapidly as could to the scene of the accident. He assisted in placing Mr. Berry in the vehicle and drove him to the camp, put him in a tent and looked after him. In fifteen minutes after his arrival in camp he died, after expressing a wish to see his wife.

Other witnesses corroborated the above testimony and Coroner Rose's verdict was that death was due to accident.

The funeral of the Robert D. Berry took place on Sunday afternoon at 2.30 p.m. from the undertaking establishment of Ira W. Shoop and was largely attended. Rev. John MacKillop conducted the funeral services. Deceased was a member of the Masonic fraternity

and a number of the members were in attendance to pay the last tribute to the memory of their departed brother. The pall bearers were: W. S. Playfair, W. B. Cameron, W. A. W. Haines, O. E. Gallagher, J. A. Campbell and L. C. Fowler.

The late Mr. Berry was a native of Canada but lived for a long time near Lake City, Michigan, where he has a valuable farm. He was aged 72 years and was remarkably active for a man of so many years, as he was able to do as much work as any of the men engaged on the contract where he was employed at the time of his death.

GET THE HOOK!

Billy Perkins had a novel experience with a bear on Tuesday afternoon. He was fishing along Lizard Creek, working upstream, and was whipping a pool below a little waterfall that made a brawling noise in the woods. Right over the fall is a small log that dammed up another pool on the upper side. Billy had no luck in the lower pool and cast his flies over the logs to have a stealthy try at the hole higher up. He could not see the lower edge of the pool he was trying in but allowed his flies to float down until they were below the line of his sight over the logs. Suddenly, he felt a tug on his line and the next moment the last section of his rod and the most of his line went with a snap to the accompaniment of a "blat", like the snort of a goat. The angler thought that he had a whale of a squawfish or an alligator, for a fraction of a second. Then he changed his mind when a small black bear shot into the bushes. Simultaneously a twelve-inch trout was jerked out of the water and leaped after the bear. The piece of rod came off the line and hung up on the bank. The fish was torn from the line about three yards from the bank. The line is probably going yet. Ditto the bear.

Billy figures that the bear was lying on a small gravel bar above the logs, probably asleep. When the trout took the last fly on the cast it jerked one of the other flies across the nose of the ursine sleeper. He promptly woke up and took to the tall spruce, bringing the fish and a piece of the rod part of the way.

Billy thinks that if he had known the strike he was going to get he might have played him to better advantage.

— Fernie Free Press

No Need For Worry.

The Husband (on his deathbed)—My darling, when I am gone, how will you ever be able to pay the doctor's bills? The Wife—Don't worry about that, dear. If the worst comes to the worst, I can marry the doctor, you know.

Imagination.

"Mabel has a most wonderful power of imagination."

"Really? That's the very last thing I should have given her credit for."

"Oh, it's quite true, I assure you. She actually fancies that she's good looking."

A Lake That Stores Heat.

There is a lake that stores the sun's heat at Medave, in northeastern Transylvania. Thick beds of rock salt underlie the district, and a similar formation appears upon the surface in mounds, some of them over 100 feet in height. Among these the lake rests at fully 1,500 feet above sea level. Upon the surface its water is almost sweet, four inches below there is a twentieth of salt, at two feet there is one-fifth, and at five feet the water is practically saturated with salt. In September, after a summer's sunshine, the thermometer showed the lake's waters to be 150 degrees four feet down. Even by April, after a whole season of wintry weather, it had only been reduced to 80 degrees. Experiments have proved that this is due to absorption and retention of the sun's heat by the salt saturated solution.
